HD2106.1 - HD2106.2

HD2106.1, HD 2106.2 CONDUCTIVITY METERS - THERMOMETERS

HD2106.1 and HD2106.2 are portable instruments with LCD display. They measure **conductivity**, **liquid resistivity**, **total dissolved solids (TDS)**, and **salinity** using combined 4-ring and 2-ring conductivity/temperature probes. Temperature only is measured by Pt100 or Pt1000 immersion, penetration, contact or air probes.

The probe calibration can be performed automatically in one or more than one of the 147 $\mu\text{S}/\text{cm}$, 1413 $\mu\text{S}/\text{cm}$, 12880 $\mu\text{S}/\text{cm}$ or 111800 $\mu\text{S}/\text{cm}$ conductivity calibration solutions.

The temperature probes are equipped with an automatic recognition module and factory calibration data are stored inside.

The HD2106.2 is a **datalogger**. It memorizes up to 36,000 conductivity and temperature samples which can be transferred from the instrument connected to a PC via the RS232C and USB 2.0 serial ports. The storing interval, printing, and baud rate can be configured using the menu.

Both models are fitted with an RS232C serial port and can transfer to a PC the acquired measurements or to a portable printer in real time.

The **Max**, **Min** and **Avg** function calculates the maximum, minimum or average values.

Other functions include: the relative measurement REL, the Auto-HOLD function, and the automatic turning off which can also be excluded.

The instruments have IP66 protection degree.

A In the **HD2106.2** models of portable data logger, a new serial port miniUSB type HID (Human Interface Device) has been implemented. When making the connection to the PC by the USB cable Type A - Mini USB B-type coded CP23, no USB driver installation is requested.

B For the connection of the models **HD2106.1** to the RS232 port of your PC, the USB/serial converter is available (code **C.206**). The converter is equipped with its own drivers that have to be installed before connecting the converter to the PC.

C The port with the MiniDIN connector which is present on every model is an RS232C type. By means of the cable coded HD2110CSNM, an RS232C port of a PC or the HD40.1. printer can be connected.
